

# IIS

## Instalando o PHP em um servidor Windows2012 com IIS

# Instalação

- Você já deve ter o servidor IIS instalado
- Veremos como instalar o executável do PHP de maneira automática usando a ferramenta: Web Platform Installer
- Esta ferramenta permite a instalação de vários componentes em servidores WEB
- É possível fazer a instalação manualmente baixando do site do PHP

Web Platform Installer

## Microsoft Web Platform Installer 5.0

The Microsoft Web Platform Installer (Web PI) is a free tool that makes getting the latest components of the Microsoft Web Platform, including Internet Information Services (IIS), SQL Server Express, .NET Framework and Visual Web Developer easy. The Web PI also makes it easy to install and run the most popular free web applications for blogging, content management and more with the built-in [Windows Web Application Gallery](#).

Why you'll love it.

**It's Free**  
The Web PI is a free download with no strings attached. We don't know about you, but we definitely like free.

2 MB

**It's Tiny**  
Weighing in at under 2 megabytes, the Web PI is the fastest way to get the components that make up the Microsoft Web Platform.

**It's Smart**  
Installing Web Apps or updating the Microsoft Web Platform, Web PI's improved validation support ensures

**It's Up-To-Date**  
Whether you're updating or installing components, Web PI always includes the latest version of the Microsoft Web

By downloading and using the Web Platform Installer (WebPI), you agree to the [license terms](#) and [privacy statement](#) for WebPI. This installer will contact Microsoft over the Internet to retrieve product information. WebPI uses the Microsoft Customer Experience Improvement Program (CEIP), which is turned on by default, see [privacy statement](#) for more information. Some of the Microsoft software obtained through WebPI may use CEIP. To view which software uses CEIP, see [here](#).

**Free Download**
